Expanding Again!

Headlines:

- AVi invests in brand-new Fabrication facility.
- Machine Shop capacity Doubled.
- Group turnover tops £5m PA.

As we move into March, AVi continues to go from strength to strength with over £500,000 worth of investment in both staff and facilities taking the group turnover to over £5m pa.

Having bought an additional factory in the Autumn of 2014, we have now relocated our fabrication division into a fully renovated, two tier facility including 25 new welding bays each equipped with full extraction, flatbed benches, bottle-less welding and fully stocked toolboxes. In addition to this, brand new finishing bays have been installed including further extraction, sound proofing and screening to reduce dust and noise pollution.

The latest investment to go into AVi is the addition of the two new HAAS CNC Machines. Already having a CNC Milling Machine and a CNC Lathe, we have now installed two more

CNC Machines increasing our bed sizes and torque giving both greater flexibility and increased capacity. With both machines fully installed and commissioned, AVi is ready to meet your machining needs.

Finally, we have also invested in the latest design software meaning that our four man, in house design team are using

Solidworks 2015 including the latest Sheetworks technology improving both lead times and accuracy.

AVi's CNC Machine Shop now including two HAAS Milling Machines and two HAAS Lathes.

Going Green

We are pleased to announce that AVi had now gained the important status of being an ISO:14001 accredited company.

Having gained our ISO:9001 accreditation in September 2013, the next step was to move for the Environmental standard ISO:14001. As we move forward, we at AVi realize the importance of not only producing top quality

goods at competitive prices, but to do so in a long term sustainable way. Ensuring our future. The process began in Autumn 2014 and with new processes and measures installed, we gained full accreditation in February.
